Yours faithfully,

(D.VENKATADRI),
Assistant Secretary to Government.

Copy of Government letter No.742-I/56-41 Dated 24-5-1963 addressed to the Secy. to Government of Mysore, Public Works & Electricity Department, Bangalore.

Sir,

Sub:- Irrigation - Anantapur District - Pennar Kumudavathi Project - Draft Final Agreement.

Ref:- This Government Letter No.742-I/56-7 Dated 28-9-56.

I am directed to invite x reference to item 7 of the proceedings of the Inter State Conference of Chief Ministers and Ministers of Irrigation and Power of the States of Andhra Pradesh andMysore held at Hyderabad on 5th and 6th June 1959 and to state that the Chief Engineers of both the states could not meet so far to finalise the draft agreement of the Pennar Kumudavathi Project. It is, therefore, considered that no useful purpose would be served by holding another Inter State Conference for the purpose. It is desirable that the Agreement is finalised early.

2. In continuation of this Government Letter No.742-I/56-7 dated 28-9-56. I am directed to state as follows:-

(i) Clause 1 (2) of the Agreement

With regard to the diversion of water during the flood season, I am directed to state that the original draft agreement sent by Mysore in 11/51 provided among other things that from 1st December to 31st May each year. Supplies upto 100 cusecs at the anicut shall be passed through the under sluices or scour vents for the purpose of keeping alive the springs further down for the benefit of 275 acres of land belonging to Mysore State situated below the anicut which are irrigated by baling water from 40 wells on the margin of the Pennar river. It may thus be seen that these 100 cusecs are intended only to keep alive the springs in the river further down so as to be able to draw some 4 or 5 cusecs for irrigation in Mysore. Mysore can have no difficulties in drawing their supply as the river bed will in any event be surcharged with water from the intermediate catchment and ~~lacks~~ there is no need to let down even 50 cusecs during the flood period when the springs in the river will be automatically alive.

The alteration proposed by the Government of Mysore in their letter dated 12-5-56 can not therefore be accepted.

(ii) Clause 1(3) of the Agreement

During the Inter State Conference of Chief Engineers held in February 1959 it was agreed that grade walls across the North Pennar River would be absolutely necessary to draw feeder channels and the Chief Engineers of the two states agreed to such construction, scouring sluices of adequate dimensions being provided to meet lower needs. The Government of Mysore are therefore requested to furnish the details of the works that they propose to construct. This Government also wish to reiterate that the suggestion of Mysore to construct diversion anicuts across the Pennar River at the heads of the 13 inundation channels, situated upstream of the Pennar Kumudavathi anicut cannot be accepted as the ayacut ~~ma~~ under the Pennar Kumudavati anicut will be seriously affected.

(iii) Clause 1 (4) of the Agreement

As already pointed out the gaugings are quite necessary and important in the interest of both the Governments to see that proper share of water of each Government is drawn at theanicut.

p.t.o.

This Government feel that the clause should be retained as originally accepted.

(iv) Clause 2 of the Agreement

At the Inter State Conference held at Hyderabad on 25th and 26th February, 59, the additional clause introduced in accordance with the Inter State Water Disputes Act 33 of 1956 was generally agreed upon with the proviso however, that nothing in this shall affect the rights and responsibilities under Agreement of 1892. This clause may therefore be incorporated in the Draft agreement.

3. I am to request that the acceptance of the Government of Mysore to the Draft Agreement as proposed by this Govt. may kindly be obtained and communicated at a very early date.

4. I am to state in this connection, that it has been brought to the notice of this Government that Mysore have constructed recently several tanks in Pennar and Jayamangali basins some of which are noted below.

5. 1. Venkatapura Tank.
2. Bychapura tank
3. Myalaya tank
4. Another tank in Hosur Hobli village.

5. Of these the Bychapura tank is said to be newly constructed across the Jayamangalli river, a tributary of the Pennar river. This tank lies in the prohibited zone within the meaning of the 1892 Agreement. This Government would like to know whether the consent of the composite Madras State or Andhra Pradesh with reference to provisions under the 1892 Agreement has been obtained for the construction of the tank. I am to request that the full particulars of the tank may also be furnished.

Yours faithfully,

Sd/---

// True Copy //

SECTION OFFICER.

25.7.63.

Copy of Letter No.946 Dated 12-5-1956 from the Secretary to the Government of Mysore, Public Works Department, Bangalore, addressed to the Secretary to the Government of Andhra, Public Works and Transport Department, Kurnool.

Sir,

Subject:- Irrigation - Anantapur District - Pennar Kumudvati Project - Draft final Agreement.

Reference:- Government of Andhra Letter No.210-H/I/53-18 dated 29th November 1955.

The draft of the agreement regarding Pennar - Kumudvathi Project, as finally approved by the Government of Andhra, sent with the letter under reference for ratification has been examined by this Government. It is considered that the following changes in the several clauses of the Agreement are necessary:-

2. Clause 1 (1):

The Government of Mysore have no objection to omit the works"beyond what they are when the tanks were constructed" in the last sentence of the clause and the works "Previous" in the foot note of the clause.

Clause 1(2):

As already pointed out, the wells in the Mysore Area below the Anicut proposed by Andhra Government will get dried up even during the monsoon period i.e. from 1st June to 30th November, when rain fails or there is too much of an interval between the two successive rains. It was on this account that the discharge of 100 cusecs from the anicut was provided for. However, onfurther consideration, it is felt that instead of 100 cusecs during the monsoon period, at least 50 cusecs may be allowed during the monsoon period i.e. from 1st June to 30th November and 100 cusecs from 1st December to 31st May as previously agreed. This may be agreed to and incorporated in the agreement.

Clause 1(3)

The Government of Mysore consider that the construction of anicuts of suitable height in the Mysore area to divert water to the 13 tanks listed, in the Annexure 'B' to the Agreement, is essential, as otherwise sufficient quantity of water from the river during the flood season which are usually of short duration could not be diverted in the inaundation channels for the reason that the river has a greater fall and the flood water will flow in the river and no appreciable quantity will enter the inundation channel. Without such anicuts the inundation channels will not serve any useful purpose. The heights may be fixed after mutual discussions.

Clause 1(4) The Government of Mysore feel that the elaborate arrangements proposed for gauging and apportionment of water are unnecessary becuase time, labour and money will be unnecessarily spent without any proper return. The river also is not an important one, like the Cauvery or the Tungabhadra.

Clause 1(5)

The clause as originally agreed to by Mysore may be adopted, i.e. 21 M.C.Ft. and 170 acres, for Nagarbhavi tank.

The Government of Mysore are not agreeable to the omission of the time limit of 30 years under Clause 2 of the

p.t.o.

agreement, as it was originally agreed to by the Government of Madras (now Andhra).

3. I am to state that the Government of Mysore are prepared to finalise the agreement on the basis of the proposal made in paragraph 2 above and to request that the Government of Andhra may be moved to accept these amendments which are considered as absolutely essential.

Yours faithfully,
Sd/--
(D.K.Srinivasachar)
Secretary to Government
Public Works Department.

Sir,

Sub: Irrigation - Construction of new tanks by Government of Mysore in Pennar Jayamangali river basin - regarding.

Ref: Your letter No. PWD. 10 BRA 66 dated 12-9-66.

Andhra Pradesh has gone ahead with the Pennar Kumadvati scheme without caring to come to an agreement with Mysore on various issues involved affecting this States interest. Now, the Andhra Pradesh Government want this Government to give up all the clauses meant to safe-guard the interests of this State and enter into a virtually one-sided agreement to the detriment of this States interest. Therefore this Government need not sign any agreement with Andhra Pradesh, but reserve all rights to utilise the waters of these rivers to the best interests of our State.

Yours faithfully,

Chief Engineer (General).
